Installation Guidelines

1. Drill a hole into the base material to the depth of embedment required. The tolerances of the drill bit used should meet the requirements of ANSI Standard B212.15.

2. Blow the hole clean of dust and other material. Insert the anchor into the hole until it is flush with the surface of the base material.

3. Position the fixture. Insert the proper size screw through the fixture into the top of the anchor and tighten. Be sure screw thread fully engages the anchor body.

Fish Plastic Anchor

Fish plastic anchor is ideal to be used for building materials, even thin. It endures temperature (-40---+80), rust corrosion, aging, and chemical affect. Meanwhile it's good at electric insulation, tensibility, and high pressure. The structure designed with gear can prevent itself sliding in the hole.

Universal Anchor

Cavity anchor is ideal to be used for building materials, with thickness less than 6mm, and fasten the window curtain and mirror frame, wire plumbing, soap and towel holder, and wall shelf, etc. It is inserted into the hole and become narrow. With the turning, nylon part will be separate and become flat in the hole.

Installation Guidelines

Plastic Toggle Anchor

The Plastic Toggle Anchor is a screw autuated hollow wall anchor for use in paneling, wallboard and solid masonry. In solid base material, the anchor can be used by removing the outer wings. The Plastic Toggle Anchor is designed to develop a triangulated clamp behind the wall of the hollow basematerial.
